

Wildflowers Count survey

- An annual national survey - started in 2010, based on a core list of 99 common species from across habitats.
- Uses OS 1km squares - at present randomly assigned based on volunteers postcodes or chosen area. 1000+ surveyed in 2012, including several within the Hants Avon catchment area.
- Transect in the form of a 1km walk and/or plots of 5x5m and 1x20m
- Data held on iRecord database by BRC to be validated and entered into NBN Gateway (eventually). Also held on Plantlife server in Excel.
